Research Fields

Econometrics, Program Evaluation, Network Economics, Health Economics.

Education

| | |
|-------------------------------------------|---------------------|
| Ph.D. Economics, Rice University | May 2025 (expected) |
| M.A. Economics, Seoul National University | 2020 |
| B.A. Economics, Kyung Hee University | 2017 |

Honors

| | |
|---------------------------------------------------------------------------------------------------|--------------|
| John R. Kelly Graduate Student Teaching Prize in Economics, Rice University | 2023 |
| Robin C. Sickles Award for Best Performance in Qualifying Exams, Rice University | 2022 |
| Maria Esther and Carlos Linares Award for Best Performance in First-Year Courses, Rice University | 2021 |
| Graduate Fellowship, Rice University | 2020-Present |

Working Papers

“Decomposition of Causal Effect with Interference Accounting for Network Change” (Job market paper)

Abstract: Recent empirical studies emphasize the importance of indirect, or spillover, effects of a program or policy. These studies usually assume that the underlying network is fixed or unaffected by the program. However, there has been some empirical evidence suggesting the treatment can also have significant affect on network. This paper analyzes the identification and estimation of causal treatment effects while explicitly considering possible network changes resulting from a program. The main finding of this study is the decomposition of the causal effect into two distinct parts: the effect of treatment when the network remains unchanged and the effect when only the network structure is changed by the treatment. This contributes to the literature by enhancing our understanding of the mechanisms of a policy or program through the consideration of counterfactual scenarios in which the network is either changed or unchanged due to treatment. The proposed method is applicable in quasi-experimental situations using a Difference-in-Differences approach, as well as in randomized experiments. A straightforward multi-step estimation procedure for the causal effects and their decompositions is introduced, and its performance is evaluated through a Monte Carlo study, and an empirical illustration.

Teaching and Research Experience

| | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|
| Teaching Assistant, Rice University — Econometrics I (G), Econometrics II (G) | 2021-Present |
| Teaching Assistant, Seoul National University — Econometrics (G), Topics in Econometrics (G) | 2018-2019 |
| Teaching Assistant at Kyung-Hee University — Macroeconomics I (UG), Macroeconomics II (UG) | 2015 |
| Research Assistant with Professor Yoon-Jae Whang, Seoul National University | 2018-2020 |
| Research Assistant with Professor Jungmin Lee, Seoul National University — “Establishment The Database for The Socio-Economic Level of Korea” using Database of Korea National Insurance Service (NHIS) | 2018-2019 |
| Research Assistant with Professor Jungmin Lee, Hyuncheol Bryant Kim, Jisoo Hwang, Seoul National University — “Job Displacement and The Economic, Health Outcomes” using Database of Korea National Insurance Service (NHIS) | 2019-2020 |
| Science Korea Research Assistantship, Korea Research Foundation | 2019-2020 |
| Brain Korea 21 Plus Research, Seoul National University | 2018 |

Professional Experience

| | |
|-------------------------------------------------------------------------------|------|
| Research Assistant, Korea Institute for Industrial Economics and Trade (KIET) | 2014 |
|-------------------------------------------------------------------------------|------|

Conferences and Seminars

| | |
|------------------------------------|------------------|
| Brown-Bag seminar, Rice University | 2022, 2023, 2024 |
| Texas Econometrics Camp Conference | 2024 |

Skills

| | |
|--------------|----------------------------------------------------------|
| Programming: | Matlab, Stata, Mata, SAS, SAS-IML, R, Python, Julia, SQL |
| Others: | Git, HTML&CSS |
| Languages: | English (Fluent), Korean (Native) |
